TARPULINS

STOCK CODE	SIZE	TYPE
TARP2MX3M	2 m X 3 m	PVC Tarpaulin, 550 gr, blue/green
TARP3MX4M	3 m X 4 m	PVC Tarpaulin, 550 gr, blue/green
TARP4MX5M	4 m X 5 m	PVC Tarpaulin, 550 gr, blue/green
TARP4MX6M	4 m X 6 m	PVC Tarpaulin, 550 gr, blue/green
TARP5MX6M	5 m X 6 m	PVC Tarpaulin, 550 gr, blue/green
TARP6MX4M	6 m X 4 m	PVC Tarpaulin, 550 gr, blue/green
TARP6MX6M	6 m X 6 m	PVC Tarpaulin, 550 gr, blue/green
TARP6MX8M	6 m X 8 m	PVC Tarpaulin, 550 gr, blue/green
TARP9MX8M	9 m X 8 m	PVC Tarpaulin, 550 gr, blue/green
TARP10MX10M	10 m X 10 m	PVC Tarpaulin, 550 gr, blue/green
TIE9M50	50 mm	Tie-down, white, 50 mm
SHORTTAIL50	50 mm	Short tail, white, 50 mm
RAT50	50 mm	Ratchet, long, 50 mm
TIE9M75	75 mm	Tie-down, white, 75 mm
SHORTTAIL75	75 mm	Short tail, white, 75 mm
RAT75	75 mm	Ratchet, long, 75 mm
CARGONETS	-	To any specifications

Sizes can be customised to customer requirements

550 GR, 700 GR AND 800 GR AVAILABLE

WELDING SCREENS

ADVANTAGES OF WELDING SCREENS:

- Easy installation and replacement.
- Provide easy access and can be rearranged as needed.
- When properly positioned, sound shield welding screens can create a barrier from the rest of the building to contain the noise produced.
- Welding screens are composed of materials to create a superior barrier that can withstand extreme heat exposure.
- Limits welding chemicals and fumes.
- Welding safety curtain and screen products create an enclosure that combined with other protective measures like ventilation, cooling fans and respirators, keep everyone in the environment safe from harm.
- Welding screens are flame resistant to protect welders and others in the facility from any flashes or other debris.
- Protect both bystanders and the welder against the harmful radiation during welding work.

APPLICATIONS INCLUDE:

- Engineering
- Workshops
- Welding bays
- Mines
- Oil and gas
- Manufacturing
- Manual arts
- Trade training centres
- Every facility with a welding process

	SIZE	TYPE
WSF2M2M	2 m x 2 m	Mobile welding screen frame
WSF2M3M	2 m x 3 m	Mobile welding screen frame
WSMY2MX2M	2 m x 2 m	Yellow welding screen
WSMY2MX3M	2 m x 3 m	Yellow welding screen
WSMY3MX3M	3 m x 3 m	Yellow welding screen
WSMY2MX1.5M	3 m x 1.5 m	Yellow welding screen
WSMY1.8M2.4M	1.8 m x 2.4 m	Yellow welding screen

Sizes can be customised to customer requirements.

STRIP CURTAINS

POLAR PVC STRIP CURTAINS

- Clear strips are transparent with a blue tint on the edges.
- Polar PVC strip curtains remain soft even at -50°C , allowing easy passing of people, vehicles and goods. Therefore, it effectively prevents loss of cold air.
- These strip curtains do not have active components and do not produce noise during use.
- Independent tests have proven Polar PVC strips to reduce up to 50% of energy costs.
- Helps retail chill cabinets meet statutory temperature.

Available in clear: 200 mm x 2 mm
• 300 mm x 3 mm • 400 mm x 4 mm

WELDING STRIP CURTAINS

- Welding strip curtains are designed to save energy, protect workers, and reduce noise in warehouse and factory applications.
- Specifically designed for areas where welding is being performed.
- Its tinted colour helps reduce the incidental effects of bright, ultraviolet light that sparks from welding arcs. Yet also transparent enough to allow supervisors and others to view the welding area.
- Protect both bystanders and the welder against the harmful radiation during welding work.

Available in bronze, yellow, blue/green:
200 mm x 2 mm

BENEFITS OF STRIP CURTAINS:

Designed to save energy

Maintains the rooms ambient temperature

Welding sparks bounce off the thick material

Divides rooms and reduces noise

Admits light and omits rain, wind and draughts from the workplace

Creates an easy passage for personnel, forklifts and machinery

Easy to install, clean and replace

FIRE BLANKETS

GLASS FIBRE

STOCK CODE	SIZE	TYPE
GF2MX2M	2M X 2M	Glass, fibre, each
GF2MX3M	2M X 3M	Glass, fibre, each
GF3MX3M	3M X 3M	Glass, fibre, each
GF062ROLL	1M X 50M	Glass, fibre, 0.62 mm, roll
GF040ROLL	1M X 50M	Glass, fibre, 0.40 mm, roll

SILICONE COATED

STOCK CODE	SIZE	TYPE
SC2MX2M	2M X 2M	Silicone coated, Sasol spec, each
SC2MX3M	2M X 3M	Silicone coated, Sasol spec, each
SC3MX3M	3M X 3M	Silicone coated, Sasol spec, each
SC550ROLL	1M X 50M	Silicone coated, Sasol spec, roll

CERAMIC FIBRE

STOCK CODE	SIZE	TYPE
CF2MX2M	2M X 2M	Ceramic fibre, 1200 degrees, each
CF2MX3M	2M X 3M	Ceramic fibre, 1200 degrees, each
CF1200ROLL	1M X 30M	Ceramic fibre, 1200 degrees, roll

PRE-OX FIBRE

STOCK CODE	SIZE	TYPE
PO2MX2M	2M X 2M	Pre-ox fibre, black, each

Sizes can be customised to customer requirements.

SPILL MATS

- Bunded mats are ideal to capture spills when working with or storing items which may leak.
- Spill mats are manufactured using a high temperature which ensures leak-tight joints. resistance welding process

- High density foam encased with chemical resistant PVC.
- Health and safety compliant.
- Returns to its original shape immediately after being driven over.
- Easy transport and set up.

Applications:

- To use as a mat to protect surfaces when working with oil or hazardous fluids.
- Can be used in the automotive and mining Industry.
- Can be used to contain small amounts of fluid for short periods.

CODE	DESCRIPTION	DIMENSIONS
S/MAT8X5	SPILL MAT 1000G PVC	8M X 5M WITH BUND
S/MAT4X6	SPILL MAT 1000G PVC	4M X 6M WITH BUND
S/MAT2X3	SPILL MAT 1000G PVC	2M X 3M WITH BUND
S/MAT3X4	SPILL MAT 1000G PVC	3M X 4M WITH BUND

- Material: 1000G PVC black.
- Manufactured in South Africa.
- Custom sizes available.
- Bund walls are made from an encapsulated, compressible, closed-cell foam which allows vehicles to drive on and off the spill mat.

DAM LINERS

APPLICATIONS

PRIMARY APPLICATION

- Portable water reservoirs (zink) and irrigation
- Drop-in liners
- Concrete reservoirs (repair)
- Earth dams
- Floating covers
- Fish farming

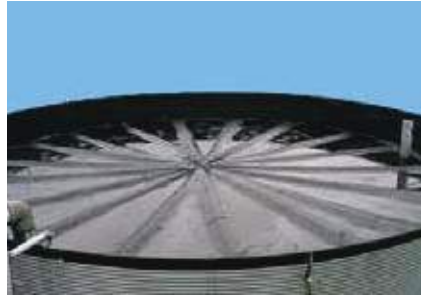

OTHER APPLICATIONS

- Aquaculture ponds (plants and animal cultivation)
- Oxidation and maturation ponds (waste water stabilisation/treatment)
- Raw water storage dams (special application technique)
- Koi ponds and water gardens
- Mining and industrial waste dams
- Animal drinking troughs
- Flexible liner storm water canals
- Fracking (oil and gas sectors)
- Mobile reservoirs (sports and temporary water supply)
- Water bladders (irrigation and pool repairs)
- Pipe boots (pipes that penetrate flexible liners)

This is a tried and tested product, with reported lifespans exceeding 12 years in the market place (not a warranty period). Having a high puncture resistance makes it ideal for DIY installations.

Neucoat is the original developer and manufacturer of this product.

FLOATING LINERS / CURTAINS

- Reduces algae build up
- Drops and rises with the water levels
- Parts float in the water to keep the cover temperature cool
- Minimise water evaporation

TEMPORARY WATER SUPPLY

- Easy to transport when compared to traditional JoJo tanks
- Used in road marathons as water points
- Would work great to keep as small fire pool in fire risk areas.

FISH HATCHERIES / RACEWAY PONDS

- Contains no algacide
- Allow for a controlled environment to minimize disease

VERTICAL WIRE WELDED RESERVOIR

- Collect rain water
- Irrigate your garden
- Vertical tanks saves space

WATER CANALS

- Conforms to any shape canal
- Helps water move rapidly to its destination
- Prevents the growth of plants
- Prevents the growth of plants and discourages hole-making by rats or termites

WATER BLADDER

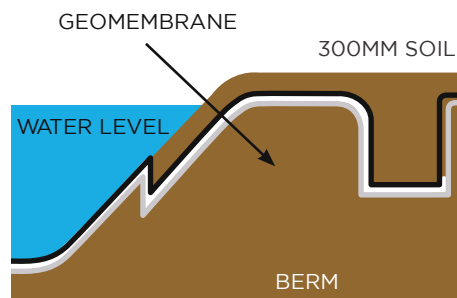

- Pool repairs
- Fire Water points CPT
- Irrigation Points
- Military water supply (PW Application)
- Also known as a water bank

DROP-IN LINER

CEMENT

EARTH DAM

Dam liners are suitable for most water storage applications. The flexible membrane combined with an internal reinforced scrim makes it incredibly tough for handling.

DAM LINER – PVC VERSUS HDPE

PVC
• Flexible and foldable
• Great tear strength
• Low transport cost
• Easy to install DIY
• High Puncture resistance
• Can conform to landscapes
• Longevity
• Easy to repair and patch

HDPE
• 4m to 7m wide rolls and can't be folded
• Hardens and cracks
• Costly and bulky to transport
• High labour cost
• Ground preparation is costly - the surface must be level and smooth
• Ruptures easily if ground preparation is not smooth once head weight is loaded
• Can only be welded on-site

GRAIN RESERVOIR

GALVANIZED STEEL GRAIN RESERVOIR

The Grain Reservoir has an estimated capacity of 130 - 150 metric tons of maize on a medium to long term solution basis. A major benefit of using the GALVANIZED STEEL reservoir is the fact that it has a longer service life.

APEX GRAIN RESERVOIR (SILO)

With the same amazing service life of the GALVANIZED STEEL GRAIN RESERVOIR, this solution

features an apex style roof for some extra protection against the elements. An added benefit to this solution is a +/- 10%(estimated) extra capacity

Note: APEX GRAIN RESERVOIRS are highly customisable to suit every customer's specific needs

WIRE MESH GRAIN RESERVOIR

With all the benefits of the GALVANIZED STEEL GRAIN RESERVOIR with the added benefit of mobility making it easy to be relocated

AUGERS

Our AUGERS are designed and manufactured with various capabilities ranging from 40 - 80 tons per hour. Options include both an electrical and an hydraulic driven version. Our AUGERS can be custom made to your specific needs

TAPER OFFLOADING BINS

Expect high capacity off-loading with this customisable solution. Combined with an AUGER this brings your productivity to its full potential

INSTALLATION

We offer installation of all these products. Contact our team for more detail.

These systems are also available in a highly cost effective flat pack solution for DIY installation

WATER RESERVOIR

CORRUGATED WATER RESERVOIR

Manufactured from 0.8mm to 1.6mm corrugated galvanised steel. This is best accompanied by a 850gsm PVC Liner

COVERS & ROOFS

Different solutions are available for COVERS & ROOFS. This ranges from steel apex shaped, shade netting and the very popular **DOMED DAM ROOF**

INSTALLATION

We offer installation of all these products. Contact our team for more detail.

These systems are also available in a highly cost effective flat pack solution for DIY installation

TOOL BAGS

Tool bags organize the tools in a decent way, so you can easily find your tools and accessories that also save valuable time.

If you are a professional contractor and need to carry a variety of tools, then you would know the importance of a tool bag.

BENEFITS OF A TOOL BAG INCLUDE:

- A tool bag is a handy option to carry plenty of useful items
- Tool bags are lighter and easier to carry than a toolbox
- The tool bag frees your hands and permit you to carry tools while climbing the ladder and many situations where using both hands is necessary.
